## *Field Service Technician*

### *The Company*

HARDI is a leading global manufacturer in the crop protection equipment sector. The company is committed to delivering better crop protection solutions to farmers and playing a significant role in sustainable food production. Our reputation for excellence and superior customer service has enabled us to achieve continued sustainable growth.

### *The Role*

Due to an increase in company growth, we are looking for a **Field Service Technician** to maintain high-level customer support functions.

Are you an experienced **technician** looking to join a growing organisation that offers great opportunities and experience? A fantastic opportunity has arisen working within a busy and motivated team at HARDI Australia, world's leading sprayer specialist.

Key activities:

- Service Phone support
- Onsite machine service and repairs (at Cavan site)
- Machine functional testing
- Field Service

The role supports HARDI's Dealer Network across Australia and New Zealand to ensure our dealers are able to provide high-level support for all HARDI products.

As a core National Service team member, our preference is for somebody with previous agricultural industry experience but this is not essential. You are proficient in the areas of hydraulics, electrical and product control systems, as well as skills with infield maintenance, break down diagnostics and repairs. You will have the ability to adopt and utilise various technology resources.

The offered role will be primarily based at our factory in Cavan, with possible interstate travel in the event of increased field service demand by our dealers. Applicants must have the ability to work autonomously and within a team environment

This is a high-energy role in an area of the business where it is sometimes necessary to work beyond normal hours to meet deadlines and customer expectations. You will therefore need to be sufficiently flexible to meet the needs of this role, as well as travel for work from time to time.

In return, you will receive an attractive remuneration package, ongoing training and development to build on your existing skills and, of course, the experience of working in one of Australia's leading manufacturer of spraying equipment.
