

Production Manager

The position:

The Production Manager refers to VP Supply Chain, is part of the Production Management Team and is the direct manager of 7 supervisors and approximately 300 production workers at the factory in Nørre Alslev, Denmark.

Main tasks:

- Preparation and execution of the production plan in collaboration with Planning Manager
- Implementation of initiatives, physically and in ERP, that supports timely delivery
- Implementation of optimisation projects that increase efficiency in collaboration with Production Engineering (PTA) and supervisors
- Planning and securing that optimised capacity is in place for on-time deliveries
- Development of the organisation and employees to ensure that HARDI has an optimised mix of competences
- Implementation of new products in production in collaboration with R&D and Production Engineering (PTA)
- To initiate, drive, and motivate projects that increase:
 - the safety in the production site
 - the documentation basis in production
 - production quality
 - sharing of the best production and safety practices in the HARDI group, including continuous implementation of Lean Tools
- Ad hoc projects short/medium term
- A performance-driven production with a focus on continuous improvements, safety, quality, productivity, and timely delivery
- Support supervisors and safety representatives in their work environment initiatives.

You will be responsible for production capacity costs, investments, etc. and a key player in maintaining a strong and well-functioning collaboration with Union Representatives.

Your qualifications:

You hold a degree in engineering as a Production Engineer or related discipline with a minimum of some years of proven professional experience within management in the manufacturing industry. You have a profound knowledge of Production Management including knowledge of manufacturing of industrial equipment (steel processing, assembly, and testing)

We also expect you to have experience with Lean optimisation, principles, and implementation. If you have direct experience with change management, it will be an additional strength.

You are strategic thinking while at the same time motivated of supporting on an operational level. You are proactive with an energetic, positive, and can-do attitude. To drive development and changes motivates you and you can lead, influence, and motivate others.

You have strong communication skills and are fluent in both written and spoken English and Danish.

As a person, you are first and foremost analytical, proactive, and self-propelled. You are solution-oriented, possess a great drive and can-do spirit, and are hands-on in problem-solving.

The job is very versatile, and you will get a great network across the entire organisation.

We offer:

- The opportunity to become a part of a very dedicated team with fast decision making and a great variety of tasks
- To be a Key Player in a dynamic international company in a transformation process

CAREER – working at HARDI

Your Crop Care Partner

- The opportunity to work in the growing agriculture industry
- An open and informal work culture
- Personal and professional development opportunities
- Competitive salary depending on skills and experience.

So, do you want to help shape the future of agriculture and make your mark on sustainable food production? At HARDI we develop intelligent sprayer solutions that not only make life easier for farmers but also make a difference for the environment.

This means that we try to go beyond state-of-the-art when we design machines that minimise the use of water and chemicals – machines that control weeds, pests, and diseases one plant at a time. Through care, innovation, and excellence, we expect to see precision farming as the solution for the future of farming. We believe in each other, our customers and farming for a sustainable future.

As mentioned, we offer an attractive pension package canteen option, and above all a fun workplace where we take care of each other.
