System Engineering – Software

About the job

We are looking for a new colleague in our Product Development Department to work closely with agronomists, designers and suppliers. You will join a dynamic and professional team of approx. 10 colleagues in Denmark, approx. 45 colleagues worldwide, mainly engineers.

To achieve the best solutions, we use professional sparring with team colleagues in an un-formal social environment.

Your responsibilities

- The tasks extend across all elements in the development process from idea to implementation in production
- You will participate in all project phases from start to finish and ensure progress until release, which requires experience and overview, attention to details as well as strong communication and collaboration skills across professional and organizational boundaries

Your profile

- You have a Bachelor or Master's degree in Software- or Electronic engineering, with minimum 3 years of experience however, newly graduated with the following skills will also be considered
- You have a professional knowledge and interest in System Engineering including system architecture, specification of software for embedded hardware, interaction between applications, interface descriptions and user functionality
- You have experience in specification and review of software for machine controls
- You have knowledge of quality processes within System Engineering and software coding
- You have knowledge of hardware
- You have knowledge of data acquisitions and thrive with test and verification
- Your way of working is systematic and targeted. You are creative, pro-active, independent and results-oriented.
- You are comfortable in the workshop environment or with the customers
- You have excellent written and verbal English communication skills
- Knowledge of agricultural or construction industry will be an advantage

We offer

A chance to make your mark on building a sustainable future for global agriculture as part of an innovative and fast-moving global company. We have more than 900 employees worldwide, of which approximately 400 work at our factory in Denmark. You will join an organisation, where the tone is informal, and the spirit is strong.

This job is based at our headquarters in Nørre Alslev, Denmark.

Application

You are welcome to contact Head of Systems Group Jess Anbo on tel. +45 23 73 18 61 for further information. We look forward to receiving your application marked "System Engineering – Software" as soon as possible. The position will be filled when the right candidate has been found. Applications will be dealt with continuously. Please submit your application by mail to hr@hardi.com. Please enlighten us on where you saw the job advertisement.
